

Product Information

General Specifications

Modular Structures

pinnacle+ provides the ultimate climbing challenge from a range of wire rope climbing structures. Modular Structures consist of a triangular or square modular layout of steel posts linked with various climbing activities.

MAIN UPRIGHTS

140mm diameter galvanised steel tube with powder coat finish.

POST CLAMPS

Powder coated cast aluminium.

CLIMBING ROPES

Synthetic strands braided over a galvanised steel wire core.

ROPE/CLAMP CONNECTIONS

Stainless steel eye nuts and thimbles.

CONNECTORS

Heavy duty mechanically pressed aluminium.

SWAGES

Heavy duty mechanically pressed aluminium.

TRAMP ISLANDS

Reinforced rubber 12.7mm thick.

POMMELS

Heavy duty rubber pommels.

HARDWARE

Vandal resistant stainless steel bolts and nuts.

FOOTINGS

Concrete to engineer's specifications with earth hard packed to mouth of hole.
