

# Product Information

## General Specifications

## Suspended Structures

**pinnacle+** provides the ultimate climbing challenge from a range of wire rope climbing structures. Suspended Structures have a tubular steel frame border around climbing nets and other ancillary activities, designed into interesting layout shapes.

### **MAIN FRAME**

140mm diameter galvanised steel tube with colour coat finish.

### **CLIMBING ROPES**

Synthetic strands braided over a galvanised steel wire core.

### **ROPE/FRAME CONNECTIONS**

Chain boss connection direct welded to frame.

### **ROPE CONNECTORS**

Heavy duty mechanically pressed aluminium.

### **ROPE SWAGES**

Heavy duty mechanically pressed aluminium.

### **RUBBER SECTIONS**

Reinforced membrane rubber 12.7mm thick.

### **POMMELS**

Heavy duty rubber pommels.

### **HARDWARE**

Vandal resistant stainless steel bolts and nuts.

### **FOOTINGS**

Concrete to engineer's specifications with earth hard packed to mouth of hole.
