

Product Information

Colour Range

The selection of colours for play equipment is an important part of the design process, and should take into account the proposed user group and the surrounding environment. Timber components can be left their natural colour which will weather to grey, or alternatively can be supplied with a protective coating in the standard Old Gold colour or other colours as shown below. Powder coat colours of the steel elements can be selected below and forms a basis for coordinating colours for other accessories to be selected as also shown below. Powder coat colours have been grouped into themes to aid selection, however the combinations possible are extensive. Specific complete colour schemes are also available for review on request.

TIMBER COLOURS

All **symmetry+** play units will be supplied with the timber coated in Old Gold colour unless otherwise specified. When specifying uncoated timber, please be aware that it will be more susceptible to weathering. Different coating colours can be used on different components in the same play unit.

UNCOATED

STANDARD COATING COLOUR

Old Gold

OTHER POPULAR COATING COLOURS

Walnut

Spotted Gum

Jarrah

POWDER COAT COLOURS

The colours below have been selected because they are popular in outdoor playground equipment applications. However, a large range of powder coat colours is available, although in some cases additional lead times and costs may be involved. It is most important to recognise that all colours fade over time, but that bright, bold or strong colours will show most noticeably (especially reds). When selecting colours (including our standard colours) please consider the effect of fading on the long term appearance of your playground as colour variations are not covered under powder coating warranties.
