

Product Information Colour Range

Modular Structures

The selection of colours for play equipment is an important part of the design process, and should take into account the proposed user group and the surrounding environment. Colours for **pinnacle+** Modular Structures can be selected by starting with the powder coat colours for the main uprights as a basis, and then selecting coordinating powder coat colours for the caps and clamps, and colour of the rope as shown below.

WIRE ROPE COLOURS

Yellow

Burnt Orange

Red

Violet

Blue

Olive Green

Bright Green

Acid Green

Natural Beige

Black

POWDER COAT COLOURS

The colours below have been selected because they are popular in outdoor playground equipment applications. However, a large range of powder coat colours is available, although in some cases additional lead times and costs may be involved. It is most important to recognise that all colours fade over time, but that bright, bold or strong colours will show most noticeably (especially reds). When selecting colours (including our standard colours) please consider the effect of fading on the long term appearance of your playground as colour variations are not covered under powder coating warranties.
